**Shandong Amor Rubber & Plastic Recycling Equipment Co.
Ltd.**

Shandong Amor Rubber & Plastic recycling equipment Co., Ltd. is located in the beautiful High-Tech Industrial Park, Jinan city, Shandong Province, covering 15000m² and is a hi-tech environmental protection equipment enterprise which conducts research and development of rubber and plastic machinery and rubber products. With its own force, the company has developed equipments, which can recycle waste plastics, waste tire, and solved the world problem of recycling waste plastics and tires, combining domestic and foreign advanced technology. Our company is keen to cooperate with the persons of vision, co-creating a bright future in the sustainable development of regenerating resources recycling!

Equipment: Research and development, manufacture, sale of waste plastics and rubber recycling equipment. The equipment boasts automation in the whole technological process, no dust, waste gas, polluted water, or waste residue, high quality, low comprehensive energy consumption, high production efficiency, re-utilizes 100% of the waste plastic and rubber.

Rubber products: Production of 30-200 mesh fine rubber powder and EPDM granules, rubber tiles and mats. The products are widely used in industry, agriculture, building material, commerce, transportation, sports and so on.

Let us make contribution to the mankind and create a fine homeland for ourselves!

treated, to reduce the harms of the waste and realize the best user of waste resources

The characters of plastic recycling equipment:

- 1. High automatic level
- 2. Low power consumption
- 3. High processing capacity
- 4. Without any pollution
- 5. Friendly control system
- 6. Stainless steel to ensure no secondary pollution.
- 7. Ideal impurity removal effect
